1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-9, and 14-17, drawn to A Flexible Wiring Board, classified in Class 174, subclass 254.

Group II. Claims 18-26, 29, drawn to A Method of Making a Flexible Wiring Board, classified in Class 29, subclass 846.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case, the claimed product can be made without recourse to the claimed process. For example, instead of plating the circuit layer one could use masking, etching, print screening, or selective depositing.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Figlin whose telephone number is (703) 308-3076.
